Type: ROUTINE INSPECTION
Date: 21-MAR-2024

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

At time of inspection, the facility did not have documentation of meeting the requirement for regularly scheduled visits to the premises by the attending veterinarian (AV) in accordance with their Program of Veterinary Care which is every 6 months. The formal arrangement with an attending or consulting veterinarian shall include regularly scheduled visits to the premises, in addition to the written program of veterinary care. The attending veterinarian had not signed the program of veterinary care since 07/2022. Each dealer shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor.

Correct by: 04/05/2024

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There was a black tailed deer at the facility that had superficial abrasions on the face, neck, flanks, and rump from a Fallow buck that had been previously been co-housed with the deer. The facility had observed the injuries first thing in the morning and immediately separated the buck into a different pasture, but the attending veterinarian had not been notified. The deer also had visible signs of prior injuries from a prior incident that the owner reported also treating but had not discussed with the attending veterinarian. All animals should be observed on a daily basis, with any problems conveyed to the attending veterinarian in a timely manner. Failure to consult with a veterinarian and provide appropriate diagnostics and treatment can result in a poor outcome for animals.

Correct by: 03/22/2024

3.153(a)(1)(ii)

Primary enclosures.

Several rusting discarded cages, old farm equipment, and other discarded items on the grounds with birds free on the grounds. The peacocks at the facility are free-roaming and have access to all areas. There were at least eight adult peacocks observed walking around the areas of clutter at the time of inspection. Discarded matter can cause injury to the free-ranging animals as well as serve as living areas for rodents and other pests. The facility must ensure the premises where housing facilities are located, including surrounding grounds, are kept clean to facilitate proper animal husbandry and sanitation.

3.154

Environment enhancement to promote psychological well-being.

The facility did not have a documented environmental enhancement plan to promote psychological well-being of their avian species as required by the Animal Welfare Act. The facility must develop, document and follow a species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan regulation and be in accordance with currently accepted professional standards.
