Site: 001
Major League Exotic Pets

Type: RE-LICENSE INSPECTION
Date: 12-JAN-2022

3.25(a)

Facilities, general.

(a) Structural strength.

The wall, directly behind the hamster enclosure has a 6 inch long by 4 inch high hole in the drywall at the base. This wall is no longer in good repair and can allow the entrance of other animals. This wall should be repaired to maintain structural strength and to keep it in good repair as required.

3.31(b)

Sanitation.

(b) Housekeeping.

Soiled and spilled bedding is present, along the base of the wall, directly behind the hamster enclosure. Premises shall be kept clean in order to facilitate the prescribed husbandry practices.

3.31(c)

Sanitation.

(c) Pest control.

During this inspection, the APHIS official observed a white mouse come through a quarter sized hole in the rubber wall cove base. This hole is adjacent to the hole in the drywall directly behind the hamster enclosure. Damaged walls allow
