Certificate: **41-B-0273**
Site: 001
JEAN BUEHL

Type: ROUTINE INSPECTION
Date: 08-APR-2015

2.75(b)(1) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

Records requirements.

The facility records are not complete. Disposition records are not being maintained to indicate the name and address of the individual receiving the animals, the number and species of animals leaving the premise and the date of disposition. The acquisition records are also not complete. The complete address of the person from whom the animals were acquired, the USDA license number of the person animals were acquired from (for those licensed under the Act), the driver's license number and state and vehicle license number and state of the person animals were acquired from (for those persons not licensed under the Act) are not recorded on the facility records. The individual dates of acquisition and number of each species acquired on each specific date are also absent. Incomplete records does not allow for tracking of the animals or ensuring that they came from proper sources. The licensee must develop and maintain complete and up-to-date records that contain all required information.

3.28(c)(2)(2)

PRIMARY ENCLOSURES.

Space requirements - hamsters.

Two enclosures housing one dwarf hamster in each and another enclosure housing two dwarf hamsters have an interior height of only 5 inches and therefore, do not meet enclosure height requirements of at least 6 inches. Inadequate space may limit the animals' ability to make normal postural adjustments, which could be detrimental to the health and well-being of the animals. These hamsters must be moved to enclosures that provide an interior height of at least 6 inches. Correct by 15 April 2015.

Inspection and exit interview were conducted with the owner.
