JACOB LAPP

Type: ROUTINE INSPECTION
Date: 24-JAN-2017

2.126(a)(2)

ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

The facility has had a formal program of veterinary care in past inspections and a recent veterinary visit was documented by a veterinary record; however the approved program of veterinary care (PVC) document could not be located by the licensee during the inspection. A written and approved PVC is required to demonstrate to APHIS officials that a veterinarian is overseeing the husbandry and care of the animals and is consulted on proper medication use at the facility. The facility must find the approved PVC and/or work with their veterinarian to ensure that a written and approved program of veterinary care is available for future inspections.

Correct by February 7, 2017.

3.31(b)

SANITATION.

The walls and ceilings had an excessive buildup of dust and cobwebs. Buildup of dust and cobwebs can increase risk of fire and disease for the animals in the building. Ensure that the walls and ceilings are maintained clean for the health and safety of the animals in the building.

Correct by February 3, 2017.

This inspection and exit interview were conducted with a facility representative.
