Repeat

Sanitation.

There is a build-up of dust, hair, and cobwebs in several areas of the building. There is a thick buildup of dust, hair and debris on the top and sides of at least 30% of all used and unused enclosures. The animal rooms also have an accumulation of dust and cobwebs on the walls, windowsills, and vents. Failure to clean animal facilities regularly can adversely affect the health of the animals and can potentially attract pests.

The facility must maintain the premise (buildings and grounds) by keeping it clean and in good repair in order to protect the animals from disease hazards and to facilitate the prescribed husbandry practices.

This inspection and exit interview were conducted with the Licensee.
