AMAZING ANIMAL AMBASSADORS LLC

Type: ROUTINE INSPECTION
Date: 04-NOV-2014

3.131(a)

SANITATION.

The layer of newspaper lining the bottom of the chinchilla enclosure was completely wetted with what appeared to be urine with/without water and a moderate amount of feces covering the papered area. Some chinchilla feces were present on the floor extending to about a foot outside of the enclosure. There was also a noticeable ammonia odor in the room.

Excreta shall be removed from primary enclosures as often as necessary to minimize disease hazards from pathogen buildup in feces and reduce odors which can contribute to discomfort or illness in animals.

Correct by 11/12/2014.

The inspection and exit briefing were conducted with the Licensee on 11/4/2014.
