FACILITIES, GENERAL.

(a) Structural strength.

*****At time of inspection the shelter for the cow, sheep and goat had portions of the wooden boards which made up the side walls missing. This allows for the potential for injury to an animal and can lead this building to become structurally unsound if this were to continue.

Repair or replace all boards that are damaged or broken to prevent injury and to keep this building in good repair.

***** The fence to the pasture to the east side of the residence which had sheep, goats, llama and alpaca has become damaged by falling tree limbs and needs repair to prevent animals from escaping and to keep in good repair.

***** An old barbed wire fence to the east of the residence needs to be repaired, replaced or removed to prevent injury to the animals. It has become rusted and sags and is unattached from the posts in several areas.

TO BE CORRECTED BY: 12/24/15

SANITATION.

(c) Housekeeping.

*****The following areas of the facility all have housekeeping issues that need to be addressed to prevent injury to the animals at the facility. This will enable personal to carry out the husbandry practices required at this facility in a more proficient manner, which helps to maintain good health in the animals at the facility.

(1) The pasture to the east of the residence has an old TV antenna, framework for a tarp, broken wire laying on the

Inspection Report

ground, damaged chain link panels and boards which need to be removed. All the broken tree limbs and tree branches need to be removed as well.

(2) In the pasture next to the nursery pen the roll of chicken wire which is not in use needs to be removed from the pen.

There are several boards laying on the ground some of which have nail heads showing that need to be removed.

Broken tree limbs and branches that no longer serve the purpose of browse need to be cleaned up and removed from the pasture. The travel carrier needs to be removed and stored outside the pasture.

(3) Behind the barn on the south side there are unused items, tree branches and limbs that need to be removed.

(4) The pasture where the small building used as shelter for the cow, sheep, goats and pig needs to have all unused material items not used in the day to day operation or for husbandry removed from the pasture.

All boards and lumber laying on the ground not currently in use needs to be removed.

TO BE CORRECTED BY: 12/24/15

This inspection and exit interview conducted by Donovan L. Fox ACI with the Facility Representative.
