3.8(a)

EXERCISE FOR DOGS.

Five French Bulldogs were housed individually. The written exercise plan that was present at the kennel did not provide guidance for individually housed dogs. The licensee stated that the dogs went into the exercise yard once a week for a half an hour weather permitting. The attending veterinarian was consulted by the inspector about their guidance for these animals and the licensee did not meet the requirements they indicated, if a dog was individually housed.

Three enclosures measuring 51 x 31 inches (10.98 sq feet) housed one dog each. Each of those dogs were approximately 25 inches long. Dogs of this size require 6.67 sq feet of minimum space under section 3.6(c)(1). They require an additional 6.67 sq. feet of space (13.35 sq. feet total) to meet all of their exercise requirements within their primary enclosure.

Two enclosures measuring 32 x 31 inches (6.89 sq feet) housed one dog each. Each of those dogs were approximately 20 inches long. Dogs of this size require 4.69 sq feet of minimum space under section 3.6(c)(1). They require an additional 4.69 sq. feet of space (9.38 sq. feet total) to meet all of their exercise requirements within their primary enclosure.

Section 3.8(c)(3) provides additional options for meeting dogs exercise requirements such as access to a run or open area at the frequency and duration prescribed by the attending veterinarian, however, the licensee is neither meeting the minimum space requirements for exercise within the primary enclosure, nor the Attending Veterinarian's guidance for exercise outside of the enclosure.

The lack of appropriate exercise can affect the dogs' mental and physical health, and impact the growth of young dogs. The licensee must develop, document and follow an appropriate plan for exercise. In addition, the plan must be approved by the attending veterinarian, and made available for APHIS upon request. The dogs must be provided the opportunity to exercise regularly at the frequency and duration prescribed by the attending veterinarian, if they are kept individually in cages, pens, or runs that provide less than two times the required floor space for that dog, as indicated by 3.6(c)(1) of this subpart.
