City Of Clovis
500 Sycamore
Clovis, NM 88101

Customer ID: **3489**
Certificate: **85-C-0006**
Site: 001
CITY OF CLOVIS

Type: ROUTINE INSPECTION
Date: 12-JUL-2017

3.125(c)

FACILITIES, GENERAL.

In the zoo commissary freezer, there is a large buildup of ice on the outside of the stored boxes of meat. This accumulation of ice on the stored food products in the freezer could damage the protective packaging and lead to dehydration and oxidation of the food, lessening the nutritional value. All food products must be stored in facilities that protect against deterioration. The cause of the ice build-up in the freezer must be repaired, and all food supplies inspected to assure that they are free of contamination. To be corrected by: August 1, 2017.

3.127(c)

FACILITIES, OUTDOOR.

In the eland outdoor exhibit area, there is a large hole (approximately 4 feet long, 2 feet wide, 2 feet deep) next to the concrete block enclosure wall. This hole appears to be due to a water drainage problem in the animal enclosure and the surrounding area on the outside of this concrete block wall. The three eland housed in this pen could potentially be injured if they stepped into this hole in their outdoor enclosure. A suitable method must be provided to rapidly eliminate excess water in this area. The source of the drainage problem in this area must be determined and a method to rapidly eliminate the water developed and implemented. To be corrected by: September 30, 2017.

This inspection and exit briefing were conducted with facility representatives.
