SAMUEL BEILER

Type: ROUTINE INSPECTION
Date: 26-MAY-2015

3.31(a)(1)

SANITATION.

Four enclosures housing 14, 11, 14; 15 adult guinea pigs respectively with their offspiring had accumulations of soiled bedding. Primary enclosures must be cleaned often enough to prevent an accumulation of feces, dirty bedding, and debris. Inadequate cleaning and sanitation exposes the animals to potential disease hazards such as bacterial, fungal and viral diseases. Primary enclosures must be cleaned and sanitized at least once every two weeks to maintain the health of the animals. Correct by ensuring that all primary enclosures are kept clean and sanitized often enough to prevent and accumulation of feces, dirty bedding and debris.

Correct by May 27, 2015

An exit briefing was conducted with the owner's wife.
