Type: FOCUSED INSPECTION
Date: 03-JUL-2024

2.31(c)(7)

Institutional Animal Care and Use Committee (IACUC).

According to an IACUC incident report, on September 24, 2023, a laboratory technician for a canine user lab completed the morning (AM) observations for two study dogs. A laboratory technician did not complete the second observation (PM) as indicated in the protocol.

During the morning laboratory record review on September 25, 2023, a ULAR veterinarian noted that the AM observation was completed but the PM observation did not occur. The protocol requires laboratory technicians to complete two observations (AM and PM) per day of all active study dogs. The Principal Investigator was contacted about the incident and the two dogs were examined by the ULAR veterinarian.

With respect to activities involving animals, the IACUC, as an agent of the research facility, shall review and approve, require modifications (to secure approval), or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities.

Corrected before the time of inspection through corrective action plan and retraining of laboratory staff.

This inspection and exit interview were conducted with facility representatives.
