Site: JFK

AEROFLOT RUSSIAN AIRLINES

Type: ROUTINE INSPECTION

Date: 29-SEP-2020

3.14(a)(6)

Primary enclosures used to transport live dogs and cats.

Item Primary Enclosure 3.14 a 6

On Sept 29, 2020 Aeroflot airlines flt 102 to NYC JFK airport transported a cat as checked baggage. The transport container did not have any up arrows to indicate the correct upright position of the primary enclosure, and only one live animal sticker on top of the enclosure, when there needs to be 1 or more live animal sticker as well .

The placing of up arrows and live animal stickers are necessary and required to ensure the safety and well being of the animal when the enclosure is not permanently affixed to the conveyance.

3.16(c)

Food and water requirements.

Item Primary Enclosure 3.16 c

On Sept 29, 2020 Aeroflot airlines flt 102 to NYC JFK airport transported one cat as checked baggage. the transport container had only 1 receptacle for food or water without having both, the animal could not have both food and water offered during transport . Transport containers must have both food and water receptacles which must be securely attached inside the primary enclosure so they can be refilled without opening the enclosure.

3.14(a)(9)

Primary enclosures used to transport live dogs and cats.

Inspection Report

Item Primary Enclosure 3.14 a 9

On Sept 29, 2020 Aeroflot Airlines flt 103 transported a cat as checked baggage. the primary enclosure failed to have any litter to absorb and excreta. The absorbent litter provides a substrates by which the animal may maintain health during transit .

Primary enclosures must have enough absorbent litter that is safe and non-toxic to cover.

This inspection and exit interview were conducted with facility representative
