

## Inspection Report

Thomas Sickie  
163 Greenfield Road  
Perryopolis, PA 15473

Customer ID: **2446**  
Certificate: **23-C-0334**  
Site: 001  
THOMAS SICKIE

Type: ROUTINE INSPECTION  
Date: 09-MAY-2016

---

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

There are several areas where the wire mesh of the inside and outside portion of the enclosure are broken, falling down, or otherwise in disrepair. These areas presented possible escape routes, areas the animals could get trapped or tangled in the wire, and a possible sources of injury through puncture or abrasion. In addition; there is a piece of tin roofing currently being used as part of the shelter structure of the goat pen. This piece is bent and broken in several places causing sharp and jagged edges exposed in the outside portion of the enclosure. One portion of the fencing of the outside enclosure is currently leaning toward the enclosure. This fencing is on a hill and is effected by rain and water flow, causing erosion of the dirt surrounding the fence posts. All enclosures and areas of the facility shall be maintained in good repair, contain the animals securely and protect the animals from injury.

Correct By: This citation is a repeat citation and remains uncorrected

### 3.131(c) REPEAT

#### SANITATION.

Although this facility has actively been working on reconfiguring the structure and setup of the facility. There is still bout 90% of all solid surfaces, wire mesh and shrouding areas that are covered with cobwebs or contained large amounts of dust, dirt and debris which could lead to respiratory issues in the animals confined therein. Inspectors noticed and heard at least one lamb coughing during today s inspection. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices.
