FACILITIES, OUTDOOR.

The licensee has a 20 foot section of perimeter fence that is not 6 foot high located along the back of the facility. This perimeter fence must be constructed so that protects the animals at the facility by restricting animals and unauthorized persons from going through it or under it. The perimeter fence also acts as a secondary containment system for the Artic foxes and Patagonian caviars. The licensee must construct this 20 foot section so that it is 6 foot high.
