### 2.134(c)

#### Contingency planning.

The facility has a written Contingency Plan in place. There was no documentation available during the inspection of the training for employees regarding their roles and responsibilities as outlined in the plan. Contingency plans and training for personnel are required to help ensure animal health and well-being in the event of an emergency or disaster. If contingency plan training is not provided, personnel may not be aware of their roles and responsibilities; animals may suffer illness, injury or death due to unpreparedness should an emergency or disaster strike. The licensee must provide and document Contingency Plan training for its personnel regarding their roles and responsibilities as outlined in the Contingency. Additionally, the licensee must conduct and document a review of the Contingency Plan at least once annually to ensure that it adequately addresses the criteria listed in paragraph (a) of section 2.134.
