SOUL OF THE WOLF

Type: ROUTINE INSPECTION
Date: 28-FEB-2018

3.131(d)

SANITATION.

There are large accumulations of rodent feces on all of the elevated resting/feeding surfaces in cage # 16 (coati). Numerous biting and non biting flies were on and around most of the big cats.

Rodents can carry diseases & parasites which can be transmitted to the animals as well as contaminate the food. Rodents can also potentially bite the animals, Flies can cause discomfort & irritations to the animals and can potentially cause biting injuries with resultant infections & pain to their ears and bodies.

The licensee has a fly control program in place, but the existing program does not appear to be entirely effective in controlling the number of flies that were observed. A more effective fly control program shall be established which would better control the number of flies that will only increase as the warmer weather approaches in the area.

A safe and effective rodent control program shall also be established to reduce the number of rodents in and around the animal enclosures.

Correct by March 21, 2018

This inspection and exit interview were conducted with the licensee
