3.11(a) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Cleaning of primary enclosures

There is an excessive accumulation of waste material and dust under the water receptacles, under food receptacles, under the PVC and wire enclosure frames, and on the doors leading to the outside runs. Unproperly sanitized surfaces can become potential hazards and can attract insects or vermin, as well as germs and odors. The facility must be properly sanitized for the health and well being of the animals.
