

## Inspection Report

Linda Miller/Riggs  
3151 Co. Rd. 143  
Annapolis, MO 63620

Customer ID: **16843**  
Certificate: **43-B-3643**  
Site: 001  
LINDA MILLER/RIGGS

Type: ROUTINE INSPECTION  
Date: 03-SEP-2014

### 2.40(b)(2) DIRECT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\*Two adult male dogs were observed in need of dental care. An adult male Poodle, microchip # 152106481A, was observed with significant coatings of brownish material on the canine and cheek teeth as well as an accumulation of brownish material that obscured the outline of the tooth on the left upper side. A male adult West Highland Terrier, microchip # 089297547, was observed with accumulations of brownish material on the lower left cheek teeth as well as extensive discoloration of the canine and cheek teeth. The gum line of the left lower canine was receded significantly with a grayish coloration to the edges of the gums in this area. These dogs had been identified by the attending veterinarian in May, 2014 for required dental work. Since that time the owner had provided dental work to these dogs at the time of grooming approximately two months ago but at this time the dogs are still in need of a more thorough dental cleaning to remove the accumulations on the teeth. Both dogs should be examined by a licensed veterinarian for these dental issues. To be corrected by: 09/10/14

### 3.6(a)(2)(1)

#### PRIMARY ENCLOSURES.

\*\*\* Two divider panels and a lower door panel on the north side of the north sheltered kennel building have areas of the coated wire material frayed and exhibiting loose points and strands of wire. These wire panels have clipped ends of wire in contact with the dogs within these pens as well. These wire panels must be replaced to reduce the potential for injury to the contained dogs due to sharp points. To be corrected by: 09/11/14

This inspection and exit interview was conducted with the owner on 09/03/14. The inspection report was delivered on 09/04/14.
