Type: ROUTINE INSPECTION
Date: 09-APR-2015

3.11(b)(3)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Currently all of the primary enclosures are being spot cleaned daily, however the sanitization of the enclosures is inconsistent and not being done at least once every 2 weeks or as often as necessary to prevent the buildup of brown grime of dirt and debris. There is a buildup of grime located on several metal doors into the outer runs, and on the white runner along the plastic waffle step located in the runs. There is a buildup of dirt and grime in the waffling of the steps that run inside the outdoor runs.

The lack of sanitization and removal of dirt and grime can provide a surface for the animals to come in contact with bacteria or other health issues that live in that material.

The licensee must sanitize at least once every 2 weeks or as often as necessary to prevent the buildup of dirt and grime on any surfaces that come in contact with the regulated animals, utilizing one of the methods described in this sec 3.11 (b)(3).

To be corrected by: April 12, 2015

Inspection and exit interview conducted with licensees wife.
