Site: 001
JURASSIC PETS L L C

Type: ROUTINE INSPECTION
Date: 16-FEB-2016

3.125(c)

FACILITIES, GENERAL.

In the rodent breeding area sitting on a stack of plastic containers is an open bag of bedding (pine shavings). Inspector observed an employee come into the rodent area pull bedding out of the open bag and did not attempt to seal or close it after leaving the area. The bedding is not being properly stored and can become moldy and contaminated by vermin.

All supplies of food and bedding shall be stored so that it is adequately protected against deterioration, molding or contamination by vermin.

To be corrected by: 02/19/2016

3.131(d)

SANITATION.

The rodent breeding room had numerous areas along walls and around the water heater where there was an accumulation of rodent feces and several areas of the insulation wall had holes, indicating a rat or other rodent problem. A live trap was observed during this inspection. Licensee did state they did have a rodent problem, but because of the amount of rodent feces present it appears to still be a problem. Insect and rodent pests are a source of bacteria, viruses, parasites and other possible infectious organisms.

Establish and maintain a safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

To be corrected by: An effective method to control these pests must be implemented and maintained by 3/1/2016
