Certificate: **31-C-0044**

Site: 002

ZOOLOGICAL SOCIETY OF CINCINNATI

Type: ROUTINE INSPECTION

Date: 17-JUN-2014

3.125(a)

FACILITIES, GENERAL.

During inspection, the outdoor enclosures for one male Grevy's zebra, two Dexter cows, and six Jacob's Four-Horned sheep had multiple areas of loose sharp metal wires. Most of the loose wires were from 2 in. by 2 in. metal fencing used to patch holes in the main fencing and gates. The wires ranged from being a quarter inch in length to several inches and most were sharp to the touch. The wires are not only sharp which can injure the animal's mouth and skin but can also be possibly ingested. Additionally, the loose fence wires do not provide a structurally sound enclosure. The housing facilities must be in good repair to protect the animals from injury and to contain the animals.

Corrected at time of inspection

Inspection was conducted with the Curator of Mammals, and the exit interview was conducted with the Zoo Director, Attending Veterinarian, Director of Animal Collections, Curator of Mammals, and Curator of Primates.

Additional Inspectors

Arango Juan, Permit Specialist
