Type: ROUTINE INSPECTION
Date: 06-OCT-2021

3.1(e)

Housing facilities, general.

A new feed room was built and it has mouse baits in use, however a live mouse was seen going into a hole inside the feed room and mouse droppings were seen on the room's floor. There were two areas in the walls where mice could get into the feed room and the feed was stored against the walls. Rodents such as mice can contaminate feed and increase disease hazards for the dogs. Ensure effective mouse control is in place, that the feed room is repaired so that rodents cannot enter it and maintain the supplies of food away from walls to allow regular cleaning around the supplies.

Correct by 10/14/2021.

This inspection and exit interview were conducted with facility representatives.
