Type: ROUTINE INSPECTION
Date: 17-OCT-2024

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The bottle of Gabapentin used to dose animals daily had expired in March, 2024, 7 months previous to the inspection. Medications may lose potency and be less effective after the manufacturer's expiration date. The facility must ensure that medications used are not expired.

Corrected at the time of inspection, 10/17/2024.

3.125(a)

Facilities, general.

One of the tiger yards had a loose panel at the top of the fence, and a bowed 14 ft section of fencing where a post had shifted position. Loose fencing may compromise the integrity of the enclosure and ability to contain animals. The facility must ensure that the enclosure is maintained in good repair.

Correction begun during inspection on 10/17/2024, and to be completed by 10/22/2024.

This inspection and exit interview were conducted with the facility representatives.
