The records were not available for review during the inspection. The licensee indicated the written Program of Veterinary Care and the records for the acquisition and disposition of the animals were not at the facility. These records must be available for review to assure the animals are receiving proper care and to account for the animals entering and leaving the facility.

Assure all required records are available for inspection.

To be corrected: From this day forward.

3.125(a)

FACILITIES, GENERAL.

In the enclosure containing the single goat, multiple areas of the fence have several stray wires that are accessible to the animal. The goat has been moved into this enclosure since the last inspection. The north, east, and south sides of the enclosure livestock fencing have chicken wire attached to the bottom. Several areas of the chicken wire have become partially detached, exposing the wires. The wires could injure the goat.

Assure the goat is housed in an enclosure that is maintained in good repair.

To be corrected: 2-5-20
