Type: ROUTINE INSPECTION  
Date: 13-NOV-2024

---

### 3.162(a)(1)

#### Primary enclosures used to transport live birds.

During a routine inspection conducted November 13 – 15, 2024, two birds were observed outside their primary transport enclosure. The primary enclosure appeared to be homemade and consisted of a wooden frame with thin plastic mesh attached to the sides. The two parakeets transported in the enclosure escaped and were observed flying around the room. The birds were retrieved at the time of inspection without injury and placed in a secure enclosure. Construction of the primary enclosures must be strong enough to contain the birds securely and comfortably and to withstand the normal rigors of transport. Birds that escape their enclosure could be injured or killed. All primary transport enclosures must be constructed to securely contain the birds. Corrected at time of inspection November 14, 2024.

This inspection and exit interview were conducted with the licensee.

#### Additional Inspectors:

HARVEY KENT, VETERINARY MEDICAL OFFICER

Lindsay Livingston, VETERINARY MEDICAL OFFICER
