#### Contingency planning.

The facility does not have a complete written contingency plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster. The current, local emergency plan discusses veterinary care for animals in need, but doesn't list other reasonably anticipated emergencies or disasters, specific tasks to be carried out in regards to animal welfare, a chain of command for who is responsible for performing those tasks, and how response and recovery will be handled. Without a comprehensive written contingency plan in place, animal welfare and health may suffer in the event of an emergency if staff is unprepared. Correct by creating a complete written contingency plan in accordance with regulation 2.134.

No regulated animals were present at the time of inspection.

This inspection and exit interview were conducted with a facility representative.
