### 2.40(b)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A bottle of meloxicam was identified with an expiration date of 11/2024. This medication was intermingled with other medications that are routinely used by the facility. Use of expired medications does not constitute the standard of care and can potentially cause adverse effects to the animals. Medications must be properly disposed of before the expiration date is reached. The medication was disposed of at the time of inspection.

Corrected at the time of inspection. To remain corrected after March 25, 2025.

### 3.10(a)

#### Watering

The water receptacle in an enclosure housing three puppies was noted to be tipped over and empty. Therefore, potable water was not made available to these puppies for an indeterminate period of time. The puppies appeared comfortable and when water was provided, two of the puppies drank briefly from the receptacle. The facility must ensure that potable water is continuously available to all dogs. Correct by March 26, 2025.

This inspection and exit interview were conducted with facility representatives.
