

Inspection Report

Teala Nooner
412 Parks Rd
Gleason, TN 38229

Customer ID: **6014143**
Certificate: **63-C-0306**
Site: 001
Teala Nooner

Type: ROUTINE INSPECTION
Date: 29-OCT-2024

3.125(a)

Facilities, general.

The enclosure housing the zebu and water buffalo backs up to a building/carport type structure. The wood panel at the back corner of the side of the building that is accessible by the animals has been damaged. There is a large hole/opening and a large loose board. Sharp points of wire and nails are present. The animals may injure themselves on the sharp points and loose board. The outdoor housing for the zebu and water buffalo shall be maintained in good repair. Correct by 11/30/24.

3.131(a)

Sanitation.

The enclosures for the African crested porcupines, coatimundi and kangaroo are in need of cleaning. A large amount of fecal material and food waste has accumulated and mixed in with shavings/dirt. An excessive number of flies were noted. Regular frequent cleaning of enclosures is necessary to prevent contamination of the animals, to minimize spread of disease, to reduce odors and to help with pest control. Excreta shall be removed from primary enclosures as often as necessary to prevent cleaning related issues. Correct by 11/2/24.

3.131(d)

Sanitation.

An excessive number of flies were present in/around the enclosures, the food/water containers and the animals themselves in the African crested porcupine, coatimundi and kangaroo enclosures. No fly control measures were observed. The licensee reports that fly control products are on order but have not yet been received. Flies can cause irritation to the animals and spread disease causing organisms. A safe and effective program for the control of insects shall be established and maintained. Correct by 11/15/24.

This inspection and exit interview were conducted with the licensee.
