Certificate: **93-R-0560**  
Site: 001  
Global Medical Devices

Type: ROUTINE INSPECTION  
Date: 18-SEP-2024

---

### 3.13(a)

#### Veterinary care for dogs.

The written program of veterinary care (PVC) for dogs is not complete or signed by the attending veterinarian. There is no plan for sampling and treatment of blood parasites or external/internal parasites, including the number of animals to be sampled. Additionally, there are no details concerning preventative care and treatment addressing any issues with the haircoat, nails, eyes, ears, skin, and teeth. Following the guidance of the attending veterinarian in a complete written program for these aspects of preventative care as well as parasite sampling and treatment ensures the dogs are receiving adequate veterinary care. A complete, written PVC for dogs must be developed, documented in writing and signed by the attending veterinarian. The program must include all of the required components as listed in the Animal Welfare Act and Animal Welfare Regulations, Part 3, Subpart A, Section 3.13.

Correct by 10/04/2024.

This inspection and exit interview were conducted with facility representatives.
