

## Inspection Report

Rick Anderson  
Tammy Anderson  
3088 Flora Rd  
Belvidere, IL 61008

Customer ID: **2619**  
Certificate: **33-C-0176**  
Site: 001  
SUMMERFIELD FARM

Type: ROUTINE INSPECTION  
Date: 22-MAY-2014

---

### 3.127(d) REPEAT

#### FACILITIES, OUTDOOR.

1. The south side of the camel pen continues to lack a perimeter fence. The entire length of the southernmost camel pen fence (located on the southeast side of the facility) is also acting as a portion of the facility's perimeter fence. The perimeter fence must be at least three feet in distance from any animal enclosure fencing. A perimeter fence is necessary to assure that unauthorized persons and wild animals do come into contact with the animals.

Assure the camel pen is completely enclosed with a perimeter fence.

2. No fewer than ten (eight foot wide) sections of perimeter fence are in disrepair. The affected lengths of fence are comprised of cyclone wire and are located along the southeastern most entrance into the facility. The bottom of the fencing has become unattached exposing gaps that range from six inches to one foot. Additionally, two top posts have disconnected causing the fence to partially collapse at the top. The fence was damaged during the winter months due to snow removal as per the facility owner. A perimeter fence is necessary to assure that unauthorized persons and wild animals do come into contact with the animals.

Assure that the affected areas of perimeter fencing are repaired or replaced

The inspection exit briefing was conducted with the facility owner.
