Sanctuary

Type: ROUTINE INSPECTION

Date: 28-JUN-2023

3.58(a)

Classification and separation.

The outside enclosure in the back of the property contains one rabbit, one deer, and three Patagonian cavy. Rabbits shall not be housed in the same primary enclosure with any other species of animals. Corrected by the end of inspection.

3.75(a)

Housing facilities, general.

In the enclosure with three two-toed sloths and two ring-tailed lemurs, multiple areas with exposed extension cords were noticed running along the ceiling. The extension cords can lead to injury if the animals were to chew or pull on the cords. Housing facilities for non-human primates must be kept in good repair, and they must protect the animals from injury. Corrected at the end of inspection.

This inspection and exit interview were conducted with Facility Representative.
