

## Inspection Report

Temple Of Isis  
20889 Geyserville Ave.  
Geyserville, CA 95441

Customer ID: **328120**  
Certificate: **93-C-1014**  
Site: 001  
Temple of Isis

Type: ROUTINE INSPECTION  
Date: 08-JUL-2019

---

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

The facility has recently made many repairs to the animal enclosures, however the enclosure for the serval named Nurani is in need of repair:

Painted corrugated panels have come loose, exposing an area behind the panel that is as large as the animal itself where there is extensive wood rot, making the structural integrity of the enclosure questionable. Another corrugated panel of similar size shows deterioration, probably from repeated urine exposure, and it appears brittle and has openings in its surface beginning to form.

Enclosures should be maintained in good repair in order to protect the animals from injury or escape.

### 3.125(c) REPEAT

#### FACILITIES, GENERAL.

In the small shed where the hay for the goats and alpaca are stored, there were many rodent droppings throughout the shed, and the hay is clearly not being adequately protected from vermin contamination.

Food and bedding should be stored in a manner which adequately protects it against deterioration, molding, or contamination by vermin. Failure to properly store animal food could be detrimental to the animals.

This inspection and exit interview were conducted with facility representatives.
