

## Inspection Report

---

Calkins Nature Area  
18335 135th St.  
Iowa Falls, IA 50126

Customer ID: **23284**

Certificate: **42-C-0223**

Site: 001

CALKINS NATURE AREA

Type: ROUTINE INSPECTION

Date: 15-JAN-2025

---

### 3.131(d)

### Repeat

#### Sanitation.

On the mammal food shelf that was a small accumulation of rodent droppings. While the facility has instituted some rodent traps, it does not seem to be an effective method of pest control. The presence of insect and mammal pests may create a disease hazard to the animal. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

### 3.154(c)(4)

#### Environment enhancement to promote psychological well-being.

The current environmental enhancement plan does not have a plan for individually housed social species of birds that are unable to see and hear birds of their own or compatible species. One peregrine falcon was moved to an indoor enclosure where no other birds can be seen or heard. Without such an environmental enhancement plan, this bird may develop abnormal behaviors and could experience psychological distress. The facility must develop, document, and implement an adequate enrichment plan with the attending veterinarian's approval for all their birds, including special attention regarding enhancement of the environment of those individually housed social species of birds that are unable to see and hear birds of their own or compatible species.

To be corrected by: 29-January-2025

This inspection and exit interview were conducted with a facility representative.
