Type: ROUTINE INSPECTION
Date: 07-JAN-2016

2.40(b)(3) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sow #621 is limping on her right hindlimb. The facility caretaker is aware of the sows' condition but the veterinarian has not been contacted and no treatment has been provided. The facility failed to contact the attending veterinarian and provide treatment in a timely manner. Problems affecting animal health must be communicated to the veterinarian and appropriate treatment provided in a timely manner. Correct by January 11, 2016.

3.125(a)

FACILITIES, GENERAL.

The top fence rail of the fence at the back of the sheep enclosure has been broken and is hanging down. The broken boards may allow the sheep to become injured and may also allow escape. The fence shall be repaired to protect the sheep from harm and help to contain the sheep in their enclosure. Correct by January 15, 2016.

On December 15, 2015 a sheep was found dead with his head stuck between the bars of the hay rack provided in the sheep enclosure. All structures provided shall be structurally sound and maintained in good repair to protect the sheep from injury. All hay racks of this type have been removed from the enclosure. Corrected.

3.131(c)

SANITATION.

There is an excessive build up of dust and cobwebs in the sheep barn. There is also excessive accumulation around the lights and sockets which creates a fire hazard. The build up of dust and cobwebs shall be minimized and accumulations removed to prevent electrical hazard and protect the sheep from harm. Correct by January 15, 2016

Inspection and exit briefing conducted with the owner and the facility caretaker.
