Certificate: **31-A-0419**
Site: 001
DUANE TROYER

Type: ROUTINE INSPECTION
Date: 26-FEB-2019

3.2(b)

INDOOR HOUSING FACILITIES.

*** Upon entering the indoor adult dog housing facility a significant ammonia odor was present. The ammonia odor was high enough that all three inspectors noted the odor to each other. The licensee was not utilizing any windows, doors, or fans for ventilation at the start of the inspection, however he did open a window and turned on a fan once the inspection started. Ammonia inhalation can be detrimental to animal health, especially the respiratory systems of dogs housed indoor with no access to the outdoors. The licensee must keep the facility sufficiently ventilated for the health and well-being of the dogs by minimizing odors, drafts, ammonia levels, and moisture condensation.

Correct by: 2/27/19

This inspection and exit interview were conducted with the licensee.
