### 2.31(c)(7)

#### Institutional Animal Care and Use Committee (IACUC).

A protocol (ZV01-2024) details the use of methods to assess the efficacy of anesthesia, but these were not documented in individual animal records. The doses of all drugs given within the protocol are also not logged in these records. Additionally, the individual record for one animal did not contain documentation of the drugs given during the experiment. Incomplete documentation of experimental procedures prevents full IACUC oversight of activities involving animals. The facility must ensure that the IACUC review and approve, require modifications in (to secure approval), or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities. Correct by September 13, 2024.

This inspection and exit interview were conducted with a facility representative.
