Type: ROUTINE INSPECTION  
Date: 13-DEC-2023

---

### 3.125(a)

#### Facilities, general.

The coatimundi outdoor enclosure is in need of repair. Inside the enclosure there is a wooden food bowl holder that has a large section broken off, exposing a screw and sharper edges of wood. Additionally, several of the shelves are water logged, warped, and starting to sag, indicating a loss in structural integrity. Enclosures with sharp points and weakened shelves can cause injury to the animal. Correct by December, 31, 2023 by ensuring all housing facilities are structurally sound and maintained in good repair to protect the animals from injury and to contain the animals.

This inspection and exit interview were conducted with a facility representative and licensee.
