Site: 001  
KAREN & GREGG WOODY

Type: ROUTINE INSPECTION  
Date: 18-JUN-2015

### 2.126(a)(2)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

There was no current inventory list of regulated animals available at the facility during the time of the inspection.

A complete updated inventory is important for proper management and traceability of the regulated animals.

The licensee must be able to provide an updated inventory of all regulated animals during the time of the inspection.

To be corrected by: The licensee wrote up an inventory by the end of the inspection.

### 3.125

#### FACILITIES, GENERAL.

There is approximately an 8-12 inch long x 1x1inch square metal pipe that is sticking out into the enclosure at approximately 4.5-5feet off the ground. This pipe did support a wooden surface used by the big cats to rest on however, the boards have been removed but the metal framing is still in place. Because the pipe end protrudes into the enclosure up to 8-12 inches and is not covered with the boards, it is possible the ligers could jump up or stand up and injure themselves. There are 2 adult ligers in this enclosure

In 2 enclosures (Taliger and tiger/lion) there is a door that can be used to isolate the animals on one side or the other of the primary enclosure. In both enclosure the wooden doors are 'freely moving' and not secured open or closed.

Protruding objects inside enclosures can cause injuries to the regulated animals. The un-secured doors could trap/catch the animals in the doorway and cause possible injury, especially in the enclosure with 2 animals.

## Inspection Report

---

The licensee must repair or remove the protruding object, and secure the doors either open or closed.

To correct by: The licensee removed the section of pipe and secured the doors before the inspectors left the facility.

Inspection and exit interview conducted with licensee
