Type: ROUTINE INSPECTION
Date: 28-JUN-2016

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One female Bichon with ID tag #69 was noted to have dental tartar with a portion of the gum-line receding on the left upper cheek tooth. The Attending Veterinarian (AV) had examined the dog and noted that it had Moderate to Severe Dental Tartar at that time but did not mention the receding gum-line and stated that no treatment was needed at that time. It appears that the condition may have progressed at this time. Licensee must assure the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, to include follow-up on animals that may have progressive conditions. This follow-up assures that the animals do not suffer from worsening of conditions. Correct by having this animal reexamined by the AV and treated as appropriate. To be corrected by: 1 July 2016

An exit interview was conducted with the facility owner.
