Langdon, KS 67583

Customer ID: **325262**  
Certificate: **48-A-2124**  
Site: 001  
Ann Allison

Type: ROUTINE INSPECTION  
Date: 04-AUG-2014

### 3.1(a)

#### HOUSING FACILITIES, GENERAL.

The divider fence between two enclosures on the south side of the "blue kennel" building is rusted that has resulted in a hole approximately 4"X4" as well as some wire points. This hole could allow dogs to pass through it and the wire points could cause injury to the dogs. All housing facilities must be constructed in a manner so dogs are securely contained and protected from injury. Correct by 4 Sept. 2014.

### 3.6(a)(2)(9)

#### PRIMARY ENCLOSURES.

In the indoor portion of one dog enclosure of the "blue trailer" there are areas where the paint has been scratched off the walls, there is a gap between the flooring material and the wall and a portion of the material on the wall is pulled away from the wall. All of these areas allow for the accumulation of dirt, debris and disease causing organisms. All surfaces must be constructed in a manner that allows them to be readily cleaned and sanitized. Correct by 18 August 2014.

This routine inspection and exit interview were conducted with a facility representative.
