

Inspection Report

Edward Laquidara
336 Sugar Rd
Bolton, MA 01740

Customer ID: **7726**
Certificate: **14-C-0063**
Site: 001
Edward Laquidara

Type: ROUTINE INSPECTION
Date: 24-JUN-2025

3.52(a)

Facilities, outdoor.

The rabbits are housed in an outdoor enclosure where natural shade and shelter from the sun are provided. However, the atmospheric temperature at the time of the inspection was measured at 94.1 degrees Fahrenheit and no artificial cooling method was provided as required under this section of the Animal Welfare Act (AWA). Temperatures above 90 degrees Fahrenheit have the potential to cause heat stress in rabbits and require the use of artificial cooling methods per the provisions of the AWA.

The facility must ensure that artificial cooling is provided for rabbits housed outdoors when the atmospheric temperature exceeds 90 degrees Fahrenheit. This issue was corrected at the time of the inspection. To remain corrected after June 24, 2025.

This inspection and exit interview were conducted with a facility representative.
