Site: 001
AMOS BEILER

Type: ROUTINE INSPECTION
Date: 18-DEC-2014

2.75(a)(2)

RECORDS: DEALERS AND EXHIBITORS.

On inspection, the acquisition records were incomplete. The acquisition records for 2014 did not have the date the dogs were sold or removed, but had disposition records stating these animals were sold. By not maintaining the required information it prevents or interferes with the dog s movements to be tracked and verified. The licensee shall keep and maintain all required sections of all records of acquisition and disposition for all dogs including date of sale/removed. Correct this day forward.

3.1(c)(1)

HOUSING FACILITIES, GENERAL.

In the whelping room, the carpet used in one enclosure with five West Highland white terrier puppies was determined to be in disrepair. The 2ft. by 1 ft. orange carpet was significantly frayed around the outer edge. The numerous frayed strands were approximately 1 to 3 inches in length. Any linear string-like material such as strands from a fraying carpet that an animal could ingest can cause an impaction or serious trauma to an animal s intestines. Remove the fraying carpet and monitor all materials in the enclosure to ensure worn or soiled surfaces are removed and replaced. Corrected at time of exit interview.

The inspection was conducted with the wife of the licensee and the exit interview was conducted with the licensee.
