FUNNY FARM PETTING FARM INC

Type: ROUTINE INSPECTION

Date: 28-APR-2014

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***The program of veterinary care was incomplete. The program of veterinary care needed an updated date and, signature from the veterinarian and exhibitor. The program also needed to included the goats, pigs and rabbits. The program needs to be updated and signed to ensure that the plan has been reviewed and animals have been seen at least once a year. Also the exhibitor has to arrange a formal written agreement with a veterinarian to provide adequate veterinary care to the animals in the event veterinary care needs to be provided for the betterment of the animals. The plan didn't include any euthanasia and emergency procedure. The program should include these components to ensure there is a plan in place if an animal must be euthanized or if there is an emergency. The program needs to be complete so that appropriate measures can be taken and promptly addressed. Corrected by the end of the day.

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***There was a brown rabbit housed with a white rabbit that had a quarter-sized gash in the left hind quarters. The rabbit seemed lethargic and weak. The owner stated that he did not notice the wound. The owner contacted the attending veterinarian to get the animal examined that afternoon. The attending veterinarian stated that the wound was not new and it had already begun healing. The attending veterinarian instructed the owner to spray the wound with prescribed medication twice a day. The rabbit was treated immediately after the examination. There should be a daily observation made of all animals to assess their health and well-being. There should be a direct and frequent communication of timely and accurate information on problems of animal health, behavior, and well-being to the attending veterinarian. Corrected immediately.

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

***There were no records documenting the acquisition of any of the covered species and the exhibitor shall make, keep and maintain records or forms which correctly disclose the information of these animals. The records shall

include offspring born of any animals while in his/her possession or under his or her control. Correct by May 1, 2014.

3.56(a)

SANITATION.

***The nesting box inside of the enclosure with a white rabbit was filled with dried old feces. The primary enclosures shall be kept reasonably free of excreta and other debris by periodic cleaning to minimize disease and illness of the animals. Corrected immediately.

3.131(c)

REPEAT

SANITATION.

In the primary enclosure containing the goats there were big tractor parts. These parts could potentially cause injury to the animals housed in this enclosure. These items shall be removed and the premises shall be kept in good repair in order to protect the animals from injury.

The exit briefing was conducted with the partner.
