### 2.78(a)

#### Health certification and identification.

On July 17th, 2023, the licensee transported an owl monkey across state lines (Florida to Mississippi) without a health certificate. Health certificates are important for ensuring that animals are healthy and fit for travel. Correct by September 1, 2023 by ensuring that all future nonhuman primates transported across state lines in commerce are accompanied by a health certificate executed and issued by a licensed veterinarian no more than 10 days prior to travel.

This inspection and exit interview were conducted with the licensee.
