RICHARD PECK

Type: ROUTINE INSPECTION
Date: 22-DEC-2016

3.125(a)

FACILITIES, GENERAL.

Some areas in enclosures were in need of repair. There was a hole with loose wires in between two pens for the fallow deer, a point of a panel sticking into the elk enclosure, the back wall of the shed was loose where a calf is housed, and there was some loose wire in the goat pen and in the pigs' area. Loose wire, panels and sharp points could cause injury to animals. Ensure that enclosures and fixtures such as shelters inside of enclosures are maintained structurally sound and free of sharp points for the safety of the animals.

Correct by 12/27/2016

This inspection and exit interview were conducted with a facility representative.
