

Inspection Report

Mc Grath Family Farms
1012 W Ventura Blvd.
Camarillo, CA 91360

Customer ID: **328247**
Certificate: **93-C-1015**
Site: 001
Mc Grath Family Farms

Type: ROUTINE INSPECTION
Date: 18-NOV-2014

3.56(a)(1)

SANITATION.

There was a heavy accumulation of excreta in a rabbit hutch. Food and water for the rabbits were placed next to the waste material. Maintaining primary enclosures in such a manner can attract pests, contaminate feed, and increase disease hazards to this area. A system should be in place to ensure primary enclosures are kept reasonably free of excreta and other debris by periodic cleaning to maintain the health and well-being of the animals.

To be corrected by 11/21/2014

3.129(a) REPEAT

FEEDING.

In a pen housing two sheep, there was a food receptacle which contained dirt and debris in with the food pellets. The food receptacle should be cleaned and maintained in a manner that minimizes contamination of the feed. A system should be in place to ensure animal feed is wholesome, palatable, and free from contamination to maintain all animals in good health.

Original Correction date 07/23/14

3.130 REPEAT

WATERING.

The water receptacle in the sheep pen had a heavy accumulation of brown organic material along its sides and bottom. All water receptacles shall be kept clean and sanitary to ensure the health of the animals. A system should be in place to ensure water receptacles are cleaned as often as needed to be in compliance with The Act.

Original inspection date 07/23/14

An exit briefing was conducted with the facility representative.
