Certificate: **84-R-0003**
Site: 001
COLORADO STATE UNIVERSITY

Type: ROUTINE INSPECTION
Date: 18-JUL-2023

3.127(b)

Facilities, outdoor.

One horse used for regulated activity is being grazed in a temporary pasture that does not contain any shelter structures.

Lack of sufficient shelter does not allow animals to protect themselves and increases the risk of their discomfort. Natural or artificial shelter appropriate to the local climatic conditions for the species concerned shall be provided for all animals kept outdoors to afford them protection and to prevent discomfort to such animals.

To be corrected by 7/26/2023.

3.130

Watering.

One horse used for regulated activity is being grazed in a temporary pasture. The only available water receptacle is dirty, with a dark green-brown film coating the sides and bottom of the tank. A facility representative stated that the receptacle is cleaned as needed.

Failure to provide a clean water receptacle can lead to water that becomes contaminated and animals that are reluctant to drink as often as they normally would. All water receptacles shall be kept clean and sanitary.

To be corrected by 7/26/2023.

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

MICHAEL TYGART, VETERINARY MEDICAL OFFICER

Prepared By: KATIE PRICE
