Sunrise Exchange Inc.
P.O. Box 1102
Waterloo, IA 50704

Customer ID: **5598**
Certificate: **42-C-0244**
Site: 002
Cattle Congress Grounds

Type: ROUTINE INSPECTION
Date: 17-SEP-2024

2.75(b)(1)

Repeat

Records: Dealers and exhibitors.

The facility is missing the acquisition date for 1 peahen, 5 chickens and 1 goose. Acquisition information is necessary for APHIS officials to make positive identification of animals still at the facility during inspection and to properly trace their movements.

Each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control. These records shall include the name and address of the person from whom the animals were acquired from, the USDA license or registration number of the person if they are licensed under the Act, the vehicle license number and state and the driver's license number and state of the person if they are not licensed under the Act, the name and address of the person to whom an animal was sold or given to, the date of the purchase, acquisition, sale or disposal of the animal, the species of the animal, and the number of animals in the shipment.

The facility must maintain a record of disposition for the animals and ensure all required information is properly and accurately documented at all times.

3.131(d)

Sanitation.

There was a excess presence of flies in the domestic pig enclosure, domestic cattle enclosure and the cat enclosure, the majority being in the pig enclosure. Additionally, the alpaca "Curly" has flies present on her ear wounds. While the facility does have fly bags up near the pig enclosure, they do not seem to be effective. The excess presence of flies may cause discomfort and increase the risk of disease hazards. An appropriate and effective program for fly control shall be established and maintained to provide for the health and well-being of the animals.

To be corrected by: 21-September-2024

This inspection and exit interview were conducted with facility representatives.
