Site: 001

WILDLIFE EXPERIENCE, INC.

Type: ROUTINE INSPECTION

Date: 09-FEB-2017

3.125

FACILITIES, GENERAL.

A compact florescent light bulb over the food preparation area was uncovered. In the event that the light bulb cracked, pieces of glass could contaminate the food which could lead to injury to the animals if eaten. Additionally, these bulbs typically contain mercury, which is poisonous.

A means of protecting the food preparation area and food from contamination from potential bulb breakage must be used. Should a bulb break prior to correction, any affected food must be discarded and the area restored to proper sanitation prior to re-use for preparing food.

Correct by: 28 February 2017
