Type: ROUTINE INSPECTION
Date: 27-FEB-2014

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

* A white, male Basset (# 103 376 293) in an outdoor enclosure is visibly thin. This dog had easily visible ribs, vertebrae and a defined waist. The condition of the dog may be an indication of disease, parasites or unmet nutritional needs. Licensee must seek veterinary care within 48 hrs. for this dog and record all findings and treatments for the inspector to view upon the next inspection.

* To be corrected by: 3/1/14

* A female Boston Terrier (034-044-292) has completely opaque, blue bulging eyes. This discoloration and protrusion of the eyeballs may be indicative of injury, disease or illness and may be painful.

* A female Boston Terrier (099 000 520) had a cloudy spot in the middle of the right eye on the pupil (pencil eraser size). This discoloration may be indicative of injury, disease or illness and may be painful.

These dogs must be taken to a veterinarian within the next 48 hours for a complete physical examination and treatment administered as appropriate.

* To be corrected by: 3/1/14

3.2(b)

INDOOR HOUSING FACILITIES.

(b) Ventilation.

* A strong ammonia odor was present in the "Main Building and Isolation room" (housing a total of ten puppies and 87 adult dogs). This odor caused irritation to the inspector and can irritate the respiratory system of the puppies and dogs within the building. Licensee must provide sufficient ventilation to provide for the animals health and well-being, and to minimize odors, drafts, ammonia levels, and moisture condensation. Ways to improve ventilation

Inspection Report

were discussed.

* To be corrected by: 3/16/14

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

(a) Cleaning of primary enclosures.

* The outside portion of an enclosure on the south side of the "Trailer house" (housing four dogs) had an excessive build up of fecal waste that was embedded and frozen on the flooring surface. Two enclosures in the "Isolation room" (housing two dogs and ten puppies) had a an excessive build up of fecal waste. The dogs were seen to have to stand on this build up and the excessive amount of fecal material can harbor disease causing organisms and soil the dogs. The licensee must clean the primary enclosures daily or more frequently to prevent an excessive accumulation of feces and food waste and to reduce disease hazards pests, insects and odors.

* To be corrected by: 2/28/14

** Inspection and exit conference conducted with facility representatives.
